

# CoRoN Gives Your Corn Crop What it Needs!

When it's time to apply Roundup<sup>®</sup> agricultural herbicide to Roundup Ready<sup>®</sup> Corn 2 , the crop's need for N is voracious. Adding CoRoN gives your crop vital N at a crucial growth stage.

**FACT #1:** 40-70 days after planting (waist high through pollination), the corn plant has its heaviest demand for N.

**FACT #2:** CoRoN slowly releases N over a 3-4 week period, providing the corn crop with essential N. This makes CoRoN a perfect tankmix partner with Roundup agricultural herbicide.

**CoRoN**<sup>®</sup>  
Controlled-Release Nitrogen

- Slow release of N over 3-4 weeks
- Highly efficient N source that can replace significant quantities of sidedress N at a 5:1 efficiency ratio
- Excellent supplement to high-priced, soil-applied N
- Apply CoRoN at 3-4 gallons/acre
